FOREWORD

This report represents a complete listing of proposed capital improvements for Fiscal Year 1982 and those projected by Departments for five years through 1986. It also includes a compilation of populations charts for State institutions and provides information pertaining to the legal requirements associated with the Capital Improvement Program. Details of the capital budget for FY '82 are contained in "The Maryland State Budget for the Fiscal Year Ending June 30, 1982," submitted to the General Assembly by the Governor in January 1981.

If information is desired on capital improvement projects authorized by the General Assembly in previous years, reference should be made to Department of State Planning Publication No. 80-14 entitled "Capital Improvements Authorized by General Assembly, 1966 through 1980" dated July 1980.

PART I

1982 FISCAL YEAR CAPITAL IMPROVEMENT PROGRAM, IN BRIEF, INCLUDING DEPARTMENTAL PROJECTIONS OF CAPITAL NEEDS FOR FIVE-YEAR PERIOD 1982-1986 AND RELATED STATE OF MARYLAND BONDED INDEBTEDNESS

General Considerations and Fiscal Summary

The Department of State Planning, under its basic legislative authority, serves as one of the Governor's principal staff agencies, and is assigned primarily two major capital improvements budget responsibilities. They are: (1) Preparation of the Governor's annual capital budget, and (2) compilation of a proposed five-year capital improvements program for the State.

The Department of State Planning is required to analyze, evaluate, recommend and schedule for inclusion in the capital budget those capital improvement projects of greatest urgency and importance operationally, from hundreds submitted, to ensure that the State's physical plant facilities keep pace with program needs and the demands of an ever increasing population. The program classifies projects in accordance with needs and recommends a time sequence for their construction. Also contained therein is the estimated cost of each project and an indication as to the potential impact on operations and maintenance costs. In preparing the program, the Department of State Planning consults with the Department of General Services and has the collaboration of the Department of Budget and Fiscal Planning. Also, the Senate Budget and Taxation Committee and the House Appropriations Committee participate, along with the above mentioned agencies, in the annual departmental hearings and on-site inspections.

In keeping with its initiation in fiscal year 1976, Capital Budget information will be published as an integral part of the Maryland Capital and Operating Budget published in several volumes, and entitled, "The Maryland State Budget for the Fiscal Year Ending June 30, 1982 Submitted to the General Assembly of Maryland."

The Capital Improvement Program, Fiscal Year 1982, contained herein is a concise portrayal of the capital projects shown along with Departmental Projections of Capital Needs For the Five Year Fiscal Period 1982-1986. The capital improvements authorized by the General Assembly, 1966 Through 1980 are consolidated in a separate publication, DSP Publication Number 80-14, July 1980.

The capital improvement programs procedure is formalized and continually monitored to implement improvements. It includes the preparation and distribution of detailed instructions and project submittal forms, application of space criteria, departmental hearings and maintenance of close liaison with all State agencies and institutions to thoroughly understand and evaluate programs and facility needs. The Department of State Planning, in collaboration with the Office of the Comptroller, the State Treasurer's Office, the Department of Budget and Fiscal Planning and the Department of Fiscal Services has continued to improve and refine the process leading to a more realistic Five-Year Capital Improvements Program which includes the Annual Capital Improvement Program as well as other separate bond authorization bills, excluding those pertaining to transportation. Specific space/cost relationships are established between agencies' desires and their real needs as determined by technical reviews of programs and master plans.

Capital outlays in Maryland, excepting transportation facilities which are supported by the Consolidated Transportation Bond Program and some other projects supported by revenue bonds, are financed primarily through issuance of general obligation bonds which pledge the full faith and credit of the State. These general obligation bonds, by constitutional provision, must be amortized within a fifteen-year period and they are fully secured by the State property tax. It should be noted in this regard that a constitutional amendment, Chapter 372, Laws of Maryland 1972, passed by the General Assembly and ratified in the General Election on November 7, 1972, augmented the State property tax provision. The Amendment does not change the basic conditions but adds that the annual tax shall not be collected if sufficient funds to pay the principal and interest of the debt are appropriated for this purpose in the annual State Budget. This provision, doubtlessly, will continue to bolster the significant fact that for many years the State of Maryland has continuously maintained a triple "A" rating on its general obligation bonds.

Essential capital needs must be provided; however, it is of utmost importance that such outlays be held within safe limits so as to maintain the State's long standing triple "A" credit rating. In past years, when fiscally permissible, certain categories of projects have been funded from General Fund revenues: e.g., capital projects costing \$100,000 or less, equipment items and planning funds. In 1979, appropriations of General Funds for capital projects totaled \$21,747,600. General Funds for capital projects, including planning, construction, deferred maintenance and equipment, for 1980 amounted to \$34,612,300. General Funds are not anticipated for capital projects in FY 1982.

Legal Requirements and Directives

1. Each construction appropriation request submitted to the General Assembly for a permanent or long-time construction project must be accompanied with preliminary plans and specifications. (Art. 15A, Sec. 10, Annotated Code of Maryland)
2. The "Capital Debt Management Program" subtitle of the Annotated Code of Maryland includes provisions for: (1) providing an annual affordability analysis of the State Debt, (2) creation of the Capital Debt Affordability Committee and definition of its composition and duties, (3) allocation of proposed new State debt among various categories of capital projects and for notice thereof to appropriate agencies and (4) establishing a consolidated capital debt program which may

- include a consolidated Loan Budget and one or more bills to appropriate loan authorizations. (Art. 31, Sec. 25-28)
3. Any State agency using non-budgeted or dedicated funds (including federal grants, etc.) for capital construction projects shall submit a detailed report of the use of these funds by January 10 of each year for the duration of the project to the Joint Budget and Audit Committee. (Art. 40, Sec. 56A)
 4. No land shall be acquired for any State park which is in excess of the number of acres approved by the General Assembly for this park. The approval of the General Assembly shall be required for any revisions to the Maryland Outdoor Recreation and Open Space Plan prior to the initiation of any action to obtain additional land for any State park. (Art. 66C, Sec. 344B, Annotated Code of Maryland)
 5. A project to be classified as a capital improvement shall have a useful life expectancy at least equal to the life of the bonds by which it is financed. (Art. 78A, Sec. 2, Annotated Code of Maryland)
 6. Monies derived from the sale of State construction bonds shall be used only for capital improvements and for no other purpose. (Art. 78A, Sec. 2, Annotated Code of Maryland)
 7. Unexpended funds remaining after a project is completed and accepted shall be applied to the reduction of the outstanding indebtedness of the State within one year after the date of final acceptance of the project by the State (Art. 78A, Sec. 3)
 8. Except as otherwise stipulated in the bond authorization bill, the authorization shall be terminated automatically if the particular project for which a State bond issue has been authorized by the General Assembly has not been contracted for or allocation made by the Board of Public Works within two years from the date of authorization. (Art. 78A, Sec. 4)
 9. State secretariats, departments and agencies shall transmit to the Secretary of State Planning a statement of capital projects proposed to be undertaken for study, advice and recommendation by the Department of State Planning, for consideration as an inclusion in the capital program of the State. Such secretariat, department or agency shall also, upon request, submit such information and data to the Department of State Planning and the Department of Budget and Fiscal Planning as these agencies may require in the preparation of the program. The Department of State Planning shall receive the assistance of the Department of Budget and Fiscal Planning in connection with the preparation of the annual capital budget. (Art. 88C, Sec. 6)
 10. The Governor shall provide in his annual budget a sum sufficient to establish a Revolving Preliminary Planning Fund under the jurisdiction of the Board of Public Works. For any project which is a part of the capital improvement program established pursuant to Section 6, funds may be made available upon recommendation of the Department of State Planning with the approval of the Board of Public Works, for preliminary plans, studies, design and outline specifications from the Revolving Preliminary Planning Fund. Such sums advanced shall be reimbursed to the Revolving Preliminary Planning Fund with the approval of the Board of Public Works out of the annual General Construction Loan Act, or from any other special loan fund separately authorized by the General Assembly or from general funds. (Art. 88C, Sec., 7, Annotated Code of Maryland)
 11. All requests by State agencies for capital projects shall be submitted to the Department of State Planning before July 1 of the fiscal year in which they are to be commenced unless the requesting department declares the project to be an emergency. (Art. 88C, Sec. 10, Annotated Code of Maryland)
 12. No appropriations shall be authorized for preliminary planning funds unless the agency in question has submitted to the Department of State Planning a program describing in detail the purpose of the project for which funds are being requested. (Art. 88C, Sec. 10, Annotated Code of Maryland)
 13. No changes shall be permitted in any project for which funds are requested after the preliminary plan has been completed and approved except upon the approval of the Secretary of the Department of State Planning and the Secretary of the Department of General Services. (Art. 88C, Sec. 10, Annotated Code of Maryland)
 14. All requests by State agencies for capital projects shall be accompanied with a detailed listing of all expenditures proposed for capital improvements which will be funded from non-budgeted revenues or from grants of any kind. (Art. 88C, Sec. 10 (d), Annotated Code of Maryland).
 15. All State agencies shall notify the Department of State Planning of any real property which is excess to the needs of the State agency, or of any substantial change of any real property owned by the State. The Department of State Planning shall examine the proper disposition of such property, ascertain the interest, if any, of State agencies and local governments in such property, and make appropriate recommendations to the using agency and to the Board of Public Works. (Art. 88C, Sec. 12, Annotated Code of Maryland)
 16. No work shall be started on any project without satisfactory assurances to the Board of Public Works that the project can be completed within the funds authorized. Except as otherwise provided in this Act (General Construction Loan Act), no department, board, commission, agency or institution of State government shall enter into an agreement with any political subdivision of the State in which the subdivision is authorized to make expenditures in support of any project listed in this Act when the expenditures are contingent upon future General Assembly appropriations. This restriction also applies to contingency agreements in support of those projects listed in the General Construction Loans of 1973, 1974, 1975 and 1976 which have not been approved by the Board of Public Works on the effective date of this Act. (These provisions are included in each General Construction Loan Act.)
 17. If a project has not been contracted for within two (2) years from the effective date of the General Construction Loan Act, then such project shall be deemed to have been abandoned. (Chapter 229, Laws of Maryland 1972, carries provisions of Sec. 10 of Chapter 435 of the Acts of 1968, as amended by Chapter 512 of the Acts of 1970 relating to certain construction projects)

contained in the General Construction Loan Act of 1968.)

18. Payment of State Debt. To provide that the annual tax required to be levied to pay the principal and interest on State debt authorized by the General Assembly is not levied if sufficient funds for the debt are appropriated in the annual State budget. (Amendment to Sec. 34, Art. III, Constitution of Maryland, ratified by the voters November 7, 1972)

In addition to the foregoing specific legislative requirements, other directives have been issued which bear directly upon procedures and policies concerning budgeting and programming. They include:

1. A directive of the Governor specifies that members of the secretariat and other heads of all State departments and agencies shall submit their capital budget requests to the Department of State Planning on or before July 1 of the new fiscal year. Each State department and agency shall reduce their supplemental requests to those projects deemed to be an emergency at the time of submission or which adversely affect the health and welfare of the citizenry of the State of Maryland, and which, by their very nature, could not be included by the aforementioned deadline. These specific requests must be submitted to the Governor through the Department of State Planning, for their detailed evaluation prior to his approval. All departments shall continue to submit their proposed capital improvement projects constituting their five-year program.
2. Declarations of legislative intent:
 - (a) items which properly belong in the operating budget of the State shall not be included in the annual capital budget, especially those as related to repair and maintenance work, and minor equipment items. (See Classification and Code of Objects of Expenditures, Budget Bureau, Department of Budget and Fiscal Planning.)
 - (b) when an appropriation has been made for the preparation of preliminary plans and specifications for a capital project, such plans shall be in the hands of the Department of State Planning for at least six months before that agency is authorized to recommend inclusion of construction funds for the project in a construction loan.
 - (c) disapproval is expressed by the Finance Committees of the General Assembly of action by members of the secretariat and other heads seeking to by-pass the authority of the Department of State Planning by bringing rejected, deferred or unreviewed projects directly to the Finance Committees in a belated effort to have them included in the capital budget under consideration.
 - (d) provisions in the annual capital budget bill and the Annotated Code of Maryland require all unexpended funds for completed projects be reverted one year after final acceptance of the project. The Committee is aware and concerned that such reversions are not being made by the Executive Branch. The Committee requests the Executive Branch to revert funds according to the law and finance all projects with new appropriations.
 - (e) bring into perspective the near term and future goals and supportive objectives through increased emphasis to short-range and long-range planning through submittal of programs which shall be updated annually.

To assist the State departments and institutions in the development of their annual capital improvements program, projections of capital needs for the five-year period, the Department of State Planning has issued and distributed to all departments a revised series of Planning Instructions, issued July 1, 1976, (Planning Instruction 2 was revised and re-issued in September, 1979) which spell out procedure and include sample forms for the preparation and submission of annual capital project requests and five-year projections of capital needs.

In December, 1977, the Department of State Planning in coordination with the Department of General Services published a Program Manual which contains instructions for preparing a satisfactory program for a Capital Improvement Project. This manual, if followed carefully, should enable the program-writer to provide a written description of his agency's conditions and requirements for a capital improvement. The three section manual helps the program writer: (1) explain the need for the improvement and verify its service and cost benefits; (2) describe the technical aspects of the proposed improvement; and (3) identify, through appropriate checklists, the current status of planning for the improvement.

Capital Improvement and Program Development

During the preparation of the 1982 Fiscal Year Capital Improvement Program, the Department of State Planning reviewed 249 individual projects submitted by major State agencies and institutions including those within the twelve established secretariats. (It should be noted that Senate Bill No. 347, Laws of Maryland, 1976, creating a State Board for Higher Education, provided for a Commissioner of Higher Education who shall be a member of the Governor's Executive Council). The estimated cost of the proposed capital projects approximates \$233,056,000. Individual project requests range from \$2,500 to \$16,480,000.

All projects requested for the 1982 Fiscal Year Capital Improvement Program were designated by the departments as urgently needed and assigned priority ratings to serve as helpful guides in the screening process.

The Governor's criteria for capital project selection are: (1) required to correct hazards to life or safety, (2) required to provide for the completion of construction or to equip a previously funded project, (3) required to prevent cutback in essential services, loss of Federal or other income or to effect major savings in future operating costs, (4) required to prevent substantial property deterioration or damage, and (5) requested to initiate a program or project mandated by the General Assembly.

This report includes a tabulation of all capital projects, except highways, mass transit, port and airport facilities which are funded through the Consolidated Transportation Trust Fund of the Maryland Department of Transportation. Also shown are projects for various non-State-owned assets and other projects separately funded from the annual General Construction Loan Act, which various State agencies and institutions have proposed for the five-year period 1982-1986.

The compilation of capital projects, presented in Part III of this report, provides a longer range perspective as to future State capital needs and the estimated costs of financing these projects.

Included herein is a Management Calendar, Capital Improvement Program, portraying an overview of the cyclical nature of most activities of the Capital Program Planning Division, Department of State Planning (see following page.)

Magnitude of Past and Projected Capital Needs and Basic Fiscal Data

During the 15-year period, 1966-1980, the General Assembly has authorized outlays aggregating \$3,623,845,041 exclusive of those projects funded through the Maryland Department of Transportation's Consolidated Trust Fund, e.g., highway construction, certain mass transit, port and aviation facilities. Of the aforementioned sum, \$1,376,648,908 was authorized for various State-owned capital assets as indicated:

Higher and Special Education	\$ 553,853,158
Health, Hospitals, Mental Retardation and Juvenile Services Facilities.....	169,106,600
Transportation (prior to the consolidated Transportation Trust Fund)	123,391,200
General Control (includes the Annapolis and Baltimore State Office Centers)	214,410,000
Natural Resources and Recreation.....	123,763,500
Public Safety and Correctional Services	181,657,650
Economic and Community Development	10,466,800
Total State-owned.....	<u>\$1,376,648,908</u>

The remaining \$2,247,196,133 was authorized, primarily, as direct grants for non-State-owned assets, largely to match local and Federal funds for which the State substantially bears interest and amortization costs; for example:

Public Education.....	\$1,350,000,000
Other than Education (Environment, Health, Corrections, Economic and Community Development, Arts and Sciences and General Control).....	759,295,573
Higher and Special Education	137,900,560
Total Non-State-owned	<u>\$2,247,196,133</u>

A more detailed presentation is provided in Part III of DSP Publication Number 80-14, July 1980.

During the 1980 Legislative Session, funds authorized for State-owned assets were \$122,974,800 whereas authorized appropriations for non-State-owned capital assets were \$123,912,500. Included in the latter figure is \$45,000,000 attributable to the State Public School Construction and Capital Improvement Loan of 1980; \$21,000,000 for Housing and Economic Development loans; \$11,125,000 for Jails and Detention Centers; \$3,750,000 for aid to Private Higher Education; and \$34,310,000 for Aid to Local Governments and Educational Facilities. The remainder of \$8,727,500 was authorized for aid to private Historical Restoration Projects; Nursing Home Grants; Parking Lot Paving; Shore Erosion Projects; Blind Facilities; and Arts Facilities.

During the three year period 1978-1980, General Obligation Bond authorizations totaling \$601,544,500 were enacted by the General Assembly. Of this amount, \$272,483,700 was for capital improvements to State-owned facilities and \$329,060,800 was authorized for non-State-owned facilities. Only \$52,500,000 of the non-State-owned total was for loans which will be repaid with the remainder comprising grants-in-aid to various non-State agencies.

The following tabulation summarizes the past five year Capital Improvement Programs for State agencies from agency requests to General Assembly authorizations:

Fiscal Year	Five Year Agency Capital Improvement Program Requests	Projects Recommended For Capital Funding	Capital Improvement Appropriations by the General Assembly		
			Bond Funds	General Funds	Total
1981	\$703,327,077	\$113,504,300	\$90,515,000	\$32,459,800	\$122,974,800
1980	696,251,997	91,074,100	60,044,900	20,097,600	80,142,500
1979	632,374,200	136,092,600	61,090,000	20,386,200	81,476,200
1978	821,804,200	218,954,300	87,430,100	5,839,100	93,269,200
1977	763,938,400	209,194,900	64,901,500*	64,901,500

*\$3,020,500 subject to veto

FISCAL YEAR CAPITAL IMPROVEMENTS PROGRAM BUDGET CYCLE

The current estimated five-year capital improvement needs by the State agencies totals \$740,166,369, which equates to an average annual requirement of \$148,033,274. Increased current demands in the area of corrections; community oriented facilities for health and juvenile services; governmental needs in the State Office Centers; and the continuing impact of inflationary factors all add to the high sustained average annual estimated requirements.

State agencies and institutions submitted capital improvement requests for FY 1982 totaling \$233,055,350. The recommended Fiscal Year 1982 Capital Improvement Program totals \$90,082,000. This is proposed for funding as follows: General Construction Loan of 1981—\$89,692,000; and amendment of a prior GCL — \$390,000. Excluded from the above figures are the proposed projects associated with the Public School Construction Program for Fiscal Year 1982 which will be financed through a separate bond bill. Also not included here are bond bill requests which may be submitted to the General Assembly covering Nursing Homes; Community Mental Health Center Components, Addiction, and Mental Retardation Facilities; Home Financing; Housing Rehabilitation; Housing and Small Business; Renovation of Memorial Stadium and similar projects. These and other similar projects comprise the total State Capital Program for a given Fiscal Year. Department of Transportation Capital Programs are funded separately.

The State subdivisions' proposed requests for the six year (fiscal 1982-1987 inclusive) Public School Construction Program is approximately \$xxx,xxx,xxx. Funding of the Public School Construction Program and other non-State-owned projects is generally separate from the regular capital improvement program of the State agencies and institutions. In order to effectively monitor these projects and insure fiscal responsibility in the expenditure of State funds for non-State-owned facilities, a detailed project review procedure is used by the Executive Branch to determine beyond a reasonable doubt that the proposed separate bond bill authorizes a project which clearly demonstrates that a state associated need or interest would be served by its authorization. As part of this review process, the Department of State Planning prepares a detailed Memorandum Report on each proposed non-State-owned facility bond authorization which is distributed to the Governor, the Chairman of the Senate Budget and Taxation Committee and the Chairman of the House Appropriations Committee. Departmental hearings will be scheduled whenever it is possible to do so.

In addition to inflationary pressures on the budget, the population of Maryland has increased at an estimated annual rate of 1.18% during the five year period 1976-1980. This population increase also adds to the pressure for additional services and support.

BASIC FISCAL DATA*

The data presented in this section are useful in evaluating the State's fiscal position. It should be remembered that referring herein to the State debt, the figures are exclusive of highway obligations which are serviced entirely by the dedicated highway use taxes and toll revenues; also, certain capital expenditures funded through the Maryland Department of Transportation Consolidated Transportation Trust Fund have been similarly excluded.

STATE OF MARYLAND

General Obligation Bonds Authorized But Unissued By Categories

The following table shows by categories the authorized but unissued general obligation bonds of the State at the end of each fiscal year shown:

At June 30	(in thousands)							Total
	General Construction	Public School Construction	Water Quality	Sanitary Facilities and Sewage Treatment	Hospitals and Nursing Homes	Community Colleges and Vocational Schools	Airport Development	
1975	470,766	585,105	163,278	10,591	4,236	37,482	20,000	1,477,851
1976	312,193	472,405	213,278	10,591	3,960	33,837	1,245,962
1977	255,073	310,505	176,278	10,342	4,960	20,487	967,018
1978	289,121	239,160	167,778	8,741	4,300	11,127	935,192
1979	304,362	230,410	165,278	8,126	1,000	12,842	914,307
1980	330,729	227,200	152,278	8,125	2,000	12,645	929,687
								196,710(a)

(a) Includes \$36,000,000 Outdoor Recreation Land Loan; \$11,385,000 Dredging Spoil Loan; \$24,500,000 Home Financing and Other Housing Loans; \$22,000,000 Memorial Stadium Seating and Field Facilities Loan and Other Miscellaneous Loans.

*Based on data supplied by the Office of the Comptroller.

As of June 30, 1980, State bonds outstanding will aggregate \$2,109,130,000. As of the same date, bonds "authorized but unissued" total \$929,687,940. Thus, as of June 30, 1980, the total State debt authorized amounts to \$3,038,817,940.

Included in the "authorized but unissued" figures are sizeable loans for State Public School Construction and Capital Improvements, Outdoor Recreation Land Loans, Sanitary Facilities, Water Quality, Dredging Spoil, Area Vocational School Construction and Maryland Housing Fund Loans.

The total "authorized but unissued bonds" as of June 30, 1980, increased by 1.6% as compared to the amount last year and are as follows:

**Authorized But Unissued
As of June 30, 1980**

General Construction Loan of 1964	\$ 4,791.77
Sanitary Facilities Sewerage Loan of 1965	13,780.00
Sanitary Facilities Sewerage Loan of 1966	620,121.00

Goucher College Loan of 1980	1,250,000.00
TOTAL	<u>\$929,687,939.99</u>

Of the \$929,687,940 bonds authorized but unissued, \$330,729,074 or 36% represents appropriations for State-owned projects, \$227,200,000 or 24% is appropriated for Public School Construction. The remaining 40% is for various local and private facilities including community and private colleges, water and sewerage projects, mine reclamation and cultural undertakings.

During the 1980 session of the General Assembly, total bonds authorized to finance capital outlays aggregated \$213,510,000. Of this sum \$85,515,000 in bonds were authorized for State-owned projects, \$45,000,000 in bonds were authorized for Public School Construction and the remaining \$82,995,000 was authorized for non-State-owned improvements.

Authorizations in 1979 were \$156,286,900; \$190,896,300 in 1978 and \$169,907,960 in 1977.

STATE OF MARYLAND
General Obligation Bonds Issued and Outstanding by Categories

The following table shows by category the principal amounts of outstanding general obligation bonds at the end of each of the fiscal years shown:

At June 30	(in thousands)							Total
	General Construction	Public School Construction	Water Quality	Sanitary Facilities and Sewage Treatment	Hospitals and Nursing Homes	Community Colleges and Vocational Schools	Airport Development	
1975	311,807	628,660	77,920	40,759	41,100	64,914	39,145	1,402,154
1976	508,288	763,434	71,785	36,768	37,125	70,831	36,785	1,710,343
1977	627,780	959,360	105,500	42,845	31,710	77,690	34,305	2,065,910
1978	620,575	1,041,940	109,105	30,465	29,940	77,920	31,700	2,172,960
1979	605,055	1,057,390	106,430	36,035	24,380	70,610	28,975	2,154,075

							222,505(a)	

(a) Includes Home Financing Loans and Other Housing Loans (\$67,865,000); Maryland Port Authority Loans (\$20,685,000); Outdoor Recreation Land Loan (\$10,995,000) and Other Miscellaneous Loans.

STATE DEBT DATA AND CAPITAL PROGRAMS

Debt Data

The following table presents various data showing the trend of general obligation debt, its relationship to assessed valuation and estimated full valuation of property, personal income and population, and the trend of general obligation debt service and its relationship to revenues.

	1975	1976	1977	1978	1979	1980
General Obligation Bonds (a)	\$ 1,402.2	\$ 1,710.3	\$ 2,065.9	\$ 2,173.0	\$ 2,154.1	\$ 2,109.1
% Increase (b)	25.08%	21.97%	20.79%	5.18%	(0.87%)	(0.21%)
Assessed Valuation (c)	\$28,518.8	\$31,649.9	\$34,539.8	\$36,381.4	\$41,203.5	
% Increase (b)	13.54%	10.98%	9.13%	5.33%	13.25%	
Debt Ratio (d)	4.92%	5.40%	5.98%	5.97%	5.23%	
Full Valuation (e)	\$49,314.4	\$54,875.4	\$60,049.9	\$66,941.7	\$75,592.9	
% Increase (b)	13.44%	11.28%	9.43%	11.48%	12.92%	
Debt Ratio (d)	2.84%	3.12%	3.44%	3.25%	2.85%	
Population (e)	4,111.0	4,125.0	4,139.0	4,143.0	N/A	
Per Capita Debt	\$ 341	\$ 415	\$ 499	\$ 525	N/A	
Personal Income (f)	\$26,383.0	\$29,099.0	\$31,519.0	\$34,582.0	\$37,955.0	
Debt Ratio (d)	5.32%	5.88%	6.55%	6.28%	5.68%	
General Obligation						
Debt Service (g)	\$ 125.8	\$ 155.5	\$ 184.5	\$ 216.8	\$ 244.6	
Revenues (g)	\$ 2,640.5	\$ 3,017.9	\$ 3,490.0	\$ 3,936.3	\$ 4,325.0	
Debt Service Ratio (d)	4.76%	5.15%	5.29%	5.51%	5.66%	
State Property Tax Rate Per \$100						
Assessed Valuation	21¢	21¢	23¢	20¢	20¢	20¢

- (a) Shows amounts of bonds outstanding at the end of the fiscal years shown (June 30). (\$ in millions)
- (b) Shows the percentage of increase or (decrease) of the dollar values over the preceding year's amount.
- (c) Amounts for assessed valuation and full valuation are stated as of January 1 of the year shown. January 1 of each year is the date of finality of assessments for the fiscal year beginning July 1, immediately following. Assessed valuation for all periods is based upon 100% of fair market value for personal property and public utility property. Real property assessed valuation is based upon fair market value of real property multiplied by the applicable inflation factor for that period. (\$ in millions)
- (d) The debt ratios are expressed as the principal amounts of outstanding debt as percentages of (i) assessed value (ii) estimated full value, and (iii) personal income respectively. The debt service ratios are expressed as the total annual amounts of debt service as percentages of all revenues.
- (e) Population is stated in thousands. See "Selected Economic, Social and Employment Data (Appendix A) — Population" of latest Official Statement.
- (f) Personal Income is for the calendar year ended December 31 of the year shown. See "Selected Economic, Social and Employment Data (Appendix A) — Population" of the latest Official Statement. (\$ in millions)
- (g) Amount of debt service and revenues are the respective amounts shown in the Combined Summary of Revenues, Expenditures and Changes in Surplus and Fund Balance on page F-1 of the latest Official Statement. (\$ in millions)

Bond Sales and Interest Costs

The following tabulation shows the variation in the amount of bond sales and net interest costs to the State on each sale of bonds between January 1972 and May 1980.

Date of Bond Sale	Amount (in millions)	New Interest Cost
May 1980	121.9	6.099560%
January 1980	117.3	6.191332
June 1978	115.3	5.332534
March 1978	78.8	4.729151
October 1977	139.3	4.6926
March 1977	127.4	4.7737
October 1976	145.5	4.8685
June 1976	175.4	5.4808
February 1976	150.0	5.5267
October 1975	85.9	5.2772
July 1975	155.7	5.97348
May 1975	89.2	5.5698
February 1975	84.1	5.51092
November 1974	95.3	5.6448
September 1974	85.0	5.8884
February 1974	50.0	4.6019
November 1973	57.9	4.6485
August 1973	54.3	4.93136
March 1973	100.0	4.7376
July 1972	93.5	4.5255
January 1972	64.7	4.29739

Highlights:

The Fiscal data reported herein discloses the following pertinent facts:

1.

	June 30, 1980		June 30, 1979
Total State Debt Outstanding		2,109,130,000	2,154,075,000
Supported by State Property Tax . . .	1,021,115,000		990,874,500
Not Supported by State			
Property Tax	<u>1,088,015,000</u>		<u>1,163,200,500</u>
Total Bonds "Authorized			
But Unissued"		929,687,940	914,307,082
Supported by State Property Tax . . .	702,487,940		681,889,210
Not Supported by State			
Property Tax	<u>227,200,000</u>		<u>232,417,872</u>
Total State Debt Already			
Authorized		<u>3,038,817,940</u>	<u>3,068,382,082</u>

2.

Total General Obligation Bonds Authorized General Assembly 1978-1980	Non-Repayable Grants	State Facilities Including Public School Construction	Use of State's Credit Repayable
\$560,693,200	\$195,226,300	\$365,466,900	0

3. Bonds Authorized But Unissued—June 30, 1980

Total	Non-State-Owned Facilities	Percent	State-Owned Facilities	Percent
\$929,687,940	\$598,958,866*	64%	\$330,729,074	36%

*Includes School Construction \$227,200,000.

The figure of \$598,958,866 non-State-owned facilities represents a decrease of 2% as compared to the previous year.

4. Bond Retirements and Disbursement for Debt Service:

During the 1981 fiscal year, State general obligation bonds in the amount of \$176,140,000 will be retired, of which \$86,705,000 represents bonds serviced by State property tax. Disbursements for debt service (redemptions and interest) during this period will total \$282,298,154, of this amount, \$139,245,357 represents debt service charges being repaid the State.

The fiscal position of the State remains healthy as indicated by State-Owned facilities and to insure a measure of stabilization in the State's structural indebtedness, careful attention should be given to:

- (1) The total bonds, "Issued and Outstanding" (State and Non-State-Owned facilities)
- (2) The magnitude of total bonds, "Authorized but Unissued" (Potential debt)
- (3) The issuance of bonds to provide direct grants to Non-State-Owned facilities.
- (4) Further extension of the use of the State's credit to local subdivisions and/or sanitary districts and medical facilities.
- (5) Maximum use of pay-as-you go funding as an alternative to general bond financing.

PART II

LISTING OF CAPITAL IMPROVEMENTS FOR FISCAL 1982

The Fiscal Year 1982 Capital Improvements Program consists of 79 individual projects totalling \$90,082,000. These improvements will be funded by:

1. Authorization of the General Construction Loan of 1981 in the amount of \$89,692,000.
2. Amendments to prior General Construction Loan appropriations to transfer \$390,000 of unused funds. (Amount not included in the below new money figures.)

Some of the major projects in the Capital Improvements Program include: supplemental funding for previously authorized projects due to inflation; new state facilities to consolidate functions now located in leased or inadequate buildings; numerous State park projects; health, fire and life safety projects; replacement of inadequate utilities and building modernization projects; acquisition of necessary land for new facility needs; correctional and public higher education facilities improvements; and several cultural enhancement projects. Other projects are to equip new facilities and to develop the plans necessary for future State improvements.

The Capital Improvements Budget is distributed among State agencies as shown below:

Capital Improvements Summary By Department

Workmen's Compensation Commission	\$1,200,000
Board of Public Works	18,817,000
Military Department	305,000
Department of Natural Resources	2,825,000
Department of Health and Mental Hygiene	19,391,000
Department of Public Safety & Correctional Services	17,220,000
University of Maryland	20,714,000
State Universities and Colleges	4,980,000
Maryland School for the Deaf	100,000
Morgan State University	1,575,000
Department of Economic & Community Development	2,565,000
	\$89,692,000

By major functions, the proposed Fiscal Year 1982 Capital Improvements Program is divided as follows:

	Amount	Percent of Total
General Control	20,322,000	22.7
Natural Resources	2,825,000	3.1
Health, Hospitals, and Juvenile Services	19,391,000	21.6
Public Safety & Correctional Services	17,220,000	19.2
Higher and Special Education	27,369,000	30.5
Economic and Community Development	2,565,000	2.9
	\$89,692,000	100.0

WORKMEN'S COMPENSATION COMMISSION

Project	Method of Financing	
	GCL	General Fund
Baltimore (Baltimore City):		
Alterations and renovations to 2-1/2 floors of the Civic Plaza Building to house the Workmen's Compensation Commission. This appropriation is contingent on agreement between the Workmen's Compensation Commission and the Board of Public Works that the Workmen's Compensation Commission will reimburse the State over a period of 15 years an amount equal to the principal and interest necessary to amortize the appropriation, and upon approval of the program for alterations and renovations by the Department of State Planning	\$1,200,000	

The Workmen's Compensation Commission is now located in 20,462 square feet at 108 E. Lexington Street, Baltimore. The Commission needs over 34,000 square feet to house its functions. Space is available in the Civic Plaza Building to accommodate the Commission.

BOARD OF PUBLIC WORKS

State Government Center — Annapolis — (Anne Arundel County):

Implement selected recommendations of the energy audit	\$225,000	
This request is to implement the following recommendations for the Tawes and Court of Appeals Buildings: (1) install vortex and damper controls in air handling units and (2) remove the pre-heat coils and anti-stratification devices. It will also fund the planning for a computerized energy management system for about 80% of the buildings in the Annapolis Government Center. The first two recommendations have an estimated two-year pay-back period, while the computer energy management system has an estimated 6-1/4 years pay-back period.		

Renewal of electrical utility system components in the Income Tax Building, State House, Old Armory, Court of Appeals, Hall of Records, Tawes Office Building, Treasury Building, Senate Office Building and Government House; and installation of a strainer cycle for the Central Services Building	420,000	
Funds are needed to replace the feeder lines and obsolete switching gear and panels to eliminate safety hazards and breakdowns due to overloads. The improvements should enhance the performance of the heating, ventilation and air conditioning systems and reduce maintenance costs. The strainer cycle will reduce energy consumption by using the cooling towers rather than the chillers to cool the circulating water.		

Construction of the fifth pod to the Tawes Office Building	10,200,000	
Funds for the design of this pod were authorized in 1979. As planned, the pod will provide about 90,000 gross square feet of additional space for use by the Department of Natural Resources primarily and other agencies as necessary. At the present time the State leases about 174,000 net square feet of office space in the Annapolis area. The addition will permit the State to reduce its use of leased office space in Annapolis.		

Total—Annapolis	\$10,845,000
-----------------------	--------------	-------

State Office Center — Baltimore — (Baltimore City):

Encapsulation of asbestos in State Buildings 1 and 2	135,000	
To comply with the requirements of the U.S. Environmental Protection Agency and the State's Environmental Health Administration, it is necessary to encapsulate about 2,000 square feet of asbestos, acoustical tiled ceilings in the lobbies of State Buildings 1 and 2. This request is to fund the encapsulation.		

BOARD OF PUBLIC WORKS — (Continued)

Project	Method of Financing	
	GCL	General Fund
Implement selected recommendations of the energy audit.....	575,000	
<p>This request is to implement the following recommendations for State Buildings 1 and 2; (1) add monitor and control points to the existing computerized energy management systems for the air handling units and for controlling temperature and humidity on each floor (2) upgrade damper control systems and (3) provide a solar collecting system to preheat the water for use in the cafeteria. The first two recommendations have a pay-back period of approximately four years and the third has a pay-back period of about 10 years.</p>		
Total—Baltimore	\$710,000
General:		
<p>To supplement the appropriation, "State's share to construct a District Court/Multiservice Center building in Frederick. . ." as shown on page 2544 of the Acts of 1976 and as previously supplemented by Chapter 86 of the Laws of 1979, as set forth on page I-115 of Volume I of the Maryland State Budget for the Fiscal Year ending June 30, 1980, submitted to the General Assembly by the Governor: Section 1(6) of Chapter 914 of the Acts of 1976, and Section 1(9) of Chapter 420 of the Acts of 1979 being hereby modified to the extent that work may begin upon satisfactory assurances to the Board of Public Works that said project can be completed with the aggregate of the funds herein and heretofore appropriated for that purpose—(Frederick County) ..</p>		
	\$59,000	
<p>Currently under construction, the Frederick County Courthouse will be completed in late calendar year 1981. The facility will house thirteen State agencies which must be provided telephone service. As an alternative to the State providing its own system, Frederick County has proposed that telephone service for this facility be tied into the existing county telephone system, providing uniformity in service and certain operating economies.</p>		
Construction funds for Baltimore City District Court No. 1, to be located on Wabash Avenue—(Baltimore City)	6,270,000	
<p>This facility is intended to replace the premises which the District Court now leases at 211 E. Madison St., in which are tried all motor vehicle violations occurring in the City. Construction of this facility will also provide facilities to try criminal cases of the North and Northwest sections of Baltimore City.</p>		
Preparation of detailed plans and specifications for construction of Baltimore City District Court No. 2, to be located on existing State-owned property —(Baltimore City)	150,000	
<p>This project will provide a second State-owned District Court facility within Baltimore City, handling cases arising in the East, Southeast and Northeast sections of the City.</p>		
Replace the roof at 206 Main Street, Annapolis—(Anne Arundel County)	33,000	
<p>This architecturally significant building is owned by the State and managed by Historic Annapolis, Inc. The roof is quite old and has been repaired a number of times since 1968 when Historic Annapolis began to manage the building. The slates have deteriorated. Their hard surface has been lost. Further repair would not be of much benefit.</p>		
Install ten relocatable classrooms at various State institutions — (Statewide)	750,000	
<p>The Interagency Committee for Public School Construction has excess relocatable classrooms. These classrooms can be used at such places as the University of Maryland at College Park on a temporary basis to relieve over-</p>

	GCL	General Fund
General (Continued)		
Relocatable Classrooms (Continued)		
crowding caused by major building renovations and the House of Corrections which has need for educational space.		
Total—General	\$7,262,000	
TOTAL—BOARD OF PUBLIC WORKS	\$18,817,000	

MILITARY DEPARTMENT

Frederick Armory (Frederick County)

Expand the septic sewage system at the Frederick Armory, Frederick, Maryland \$75,000

The Health Department of Frederick County is requiring the State to install additional sewage capacity at the Frederick Armory. This entails increasing the size of septic drain fields at the site. In the meanwhile, the County has granted the Armory a three year temporary use permit for the Armory while the sewage capacity is being constructed. This request will provide funds to purchase an additional 2.73+ acres of land on which to locate the septic drain fields and funds for the necessary construction.

Havre de Grace Armory (Harford County)

State's share — Repair and reroof Warehouse Building W-1 at the Havre de Grace Armory site — Havre de Grace, Maryland 85,000

The Warehouse Building at the Havre de Grace Armory site is the same structure that was originally used as the building where bets were placed when the site was used for horse racing. In 1979, the roof timbers of this building separated causing the roof to settle 2-4 inches. Emergency repairs made at the time did not correct the problem. The Military Department and the Department of General Services feel that there is a serious danger that the roof could collapse should a heavy accumulation of snow be deposited upon it. Both agencies feel the roof must be repaired without delay as the building contains the unissued military supplies for the Maryland National Guard. The Federal National Guard Bureau has agreed to share the cost of repair with the State on a 75%-25% basis. The total cost of repairs is estimated to be \$340,000 with Maryland's cost to be about \$85,000.

Chestertown Armory (Kent County)

Replace the roof at the Chestertown Armory—Chestertown, Maryland \$60,000

The Chestertown Armory was built in 1931. Its second roof has worn out and now leaks badly. Temporary repairs were made to the roof this past summer to carry it over the period until replacement funds were made available. Delay in repairing the roof would cause further water damage to the interior walls of the Armory. This request will provide the funds required to replace the roof.

Statewide Project

Correction of Fire/Safety deficiencies in various National Guard Armories located throughout Maryland 85,000

The State Fire Marshal and the Insurance Companies have observed numerous fire/safety deficiencies that require correction in order to safeguard life and protect State property. Typical work to be performed consists of installa-

MILITARY DEPARTMENT—(Continued)

Project	Method of Financing	
	GCL	General Fund
Statewide Project (Continued)		
tion of fire doors, installation of fire and smoke detector systems, replacement of fiber ceiling tile, installation of burglar alarms and stove hoods in the kitchen. It is estimated that the total cost of the work to be accomplished will cost approximately \$250,000. This work could be accomplished in three phased programs. The Military Department, in consultation with the State Fire Marshal, should determine the order of priority the work will be scheduled. It is anticipated that correction of the deficiencies will reduce the insurance premium the State will have to pay for fire insurance protection.		
Total—Military Department.....	\$305,000

DEPARTMENT OF NATURAL RESOURCES

CAPITAL PROGRAMS ADMINISTRATION:

To provide a fund for the following projects..... \$35,000

Greenbrier State Park (Washington County):

Construct chemical/oil storage building

Martinak State Park (Caroline County):

Install fencing around water tower

Rocks State Park (Harford County):

Construct roads and parking in picnic area

The purpose of this request is to construct smaller projects using in-house personnel without expending time going through the contractual processes. Funds previously provided for this program have resulted in an increase in the return on the dollars spent. Also, there is a considerable saving on time and paper work to get like projects accomplished.

Shore erosion control measures for St. Clement's Island—(St. Mary's County) 400,000

This project involves the upgrading of approximately 3,195 linear feet of shore line protection. A re-evaluation of the total requirements to complete shore erosion measures at St. Clement's has been made. It has been determined that in order to take advantage of existing contracts, permits, contractual equipment to be moved on site, etc. it would be financially advantageous to finish the job in one phase. This \$400,000 appropriation should complete the shore protection of St. Clement's Island.

TOTAL—CAPITAL PROGRAMS
ADMINISTRATION \$435,000

MARYLAND FOREST AND PARK SERVICE

Elk Neck State Park (Cecil County)

Design and construction of shore erosion control measures for Thackery Point..... 900,000

The erosion rate at Thackery Point is severe. Within this area there is a sewage treatment plant, its collection lines, its electrical supply lines and an outfall line. The integrity of this system must be preserved if Elk Neck State Park is to continue serving the public. Shore erosion control measures will be designed and constructed to correct this problem.

DEPARTMENT OF NATURAL RESOURCES—(Continued)

Project	Method of Financing	
	GCL	General Fund
Greenbrier State Park (Washington County)		
To supplement the Capital Appropriation "Construction of day use and camping facilities, including a concession building, interpretive building and parking" as authorized by Chapter 44, page 699 of the Acts of 1978 and as set forth on page I-104 of Volume I of the Maryland State Budget for the Fiscal Year ending June 30, 1979, submitted to the General Assembly by the Governor	250,000	
The FY 1979 Capital Appropriation provides for Construction of a day use and camping facilities, including a concession building, interpretive building and parking. This supplement would cover the concession building. These additional funds should complete this Greenbrier project. Greenbrier has become one of the most used parks in the State system.		
Patapsco Valley State Park (Howard and Baltimore Counties):		
Design and construction of comfort stations in the Glen Artney, Hilton and Hollofield areas	260,000	
These buildings will contain approximately 745 square feet and utilize the design used at the Pickall area of Patapsco Valley State Park. Although the new buildings themselves are of a standard design, additional design is needed for utilities and site improvements. Patapsco Valley is the heaviest used State park. 611,617 people visited Patapsco in 1979. The need for these facilities has become critical since the health department is threatening to close these areas of the park if corrective action is not forthcoming. The appropriation will fund the first phase of this corrective action.		
Point Lookout State Park (St. Mary's County)		
Design and construction of shore erosion control measures	250,000	
This project involves the design and construction of approximately 940 linear feet of stone revetment. This revetment would connect to existing stone revetment at the south end of community of Tanners Creek and the north jetty at the entrance of Tanners Creek. Project has been the subject of some concern to local citizens groups. A Shore Erosion Control Revolving Fund loan has been provided to St. Mary's County to cover that portion of land which is not State owned. This project is necessary to complete the measures already taken.		
TOTAL—MARYLAND FOREST AND PARK SERVICES		\$1,660,000
NATURAL RESOURCES POLICE FORCE		
Renovation of the bulkhead protecting the harbor at Matapeake State Park/Natural Resources Police Facility; contingent upon any funds expended from this appropriation being matched by an equal expenditure of Waterway Improvement Funds for this purpose (Queen Anne's County)	\$430,000	
This project involves the renovation of approximately 1,565 linear feet of bulkheads. Successive storms and normal erosion have seriously weakened these structures. Failure to restore the structures could lead to their loss. These bulkheads protect the Marine Police facility and serve as a small boat harbor of refuge during bay storms.		
SHORE EROSION CONTROL		
Shore erosion protection measures for Ocean City Bay (Worcester County)	\$300,000	
This project is designed to preserve and enhance the beach at Ocean City, Maryland by controlling the erosion of beach sand. The current population of Ocean City, in season, can exceed 250,000 persons on any given day. Such persons coming from throughout the State and elsewhere are believed to be		

DEPARTMENT OF NATURAL RESOURCES—(Continued)

	GCL	General Fund
Shore Erosion Control (Continued)		
primarily attracted by the quantity and quality of the beach environment. The Atlantic Ocean shoreline of Maryland, acting as a barrier beach, has eroded continuously at a rate of two to four feet per year accounting for presently narrow recreational beaches in certain areas of Ocean City.		
TOTAL—DEPARTMENT OF NATURAL RESOURCES.....	\$2,825,000

DEPARTMENT OF HEALTH AND MENTAL HYGIENE

LABORATORIES ADMINISTRATION:

Conversion of space originally programmed for laboratories but currently used as office space at Ped + 1 of the **Central Laboratory**, O'Connor Building to laboratories, utilizing plans originally prepared for the conversion of Ped + 2 (Baltimore City) \$1,255,000

The Department of Health and Mental Hygiene has requested funds to plan the conversion of space intended for laboratories but currently used as office space to laboratories. The project is necessitated by the merger of the Department of Health and Mental Hygiene and the Water Resources Administration, formerly operating under the auspices of the Department of Natural Resources. The Ped + 1 space will be converted to lab space to accommodate the laboratory needs of the Water Resources Administration.

MENTAL HYGIENE ADMINISTRATION

Crownsville Hospital Center (Anne Arundel County):

Renovation of Convalescent Cottages..... \$1,620,000

Funds were authorized by the 1978 General Assembly Session to prepare detailed plans for the renovation of the convalescent cottages. This project is the renovation of 2 convalescent cottages which were constructed in 1953, to adhere to the rules and regulations promulgated by the Commission on Accreditation of Hospitals. Alterations of the convalescent cottages are designed to insure a living environment which promotes the restoration of the physical and the mental faculties of the patients. Sleeping areas will be converted from the ward unit, into separate units of no more than four (4) beds each. Bathrooms are to be redesigned and equipped with separate toilet facilities for men and women patients and adequate safety provisions for handicapped patients. Each building will be air conditioned and provided new piping, lighting and heating controls systems. Cottage 13 will contain an elevator to facilitate program accessibility to handicapped adolescents. In addition, funds are requested to do architectural exterior repairs and energy conservation in Cottage 12.

Eastern Shore Hospital Center (Dorchester County):

Renovation of Tawes Building..... 2,460,000

This project is the renovation of the single-story Tawes Building which houses gero-psychiatric patients from the nine counties of Maryland's Eastern Shore. Renovations to the Tawes Building include central air conditioning, sprinkling system for the entire building, handicapped modifications and roof replacement. The Tawes Building presently houses 120 patients; however, after the renovation, the building will have a licensed capacity for 104 beds.

Springfield Hospital Center (Carroll County):		
Equipment for the Diagnostic and Intensive Treatment Building	110,000	
Construction of the Diagnostic and Intensive Treatment Building at Springfield Hospital Center is scheduled for completion by the Spring of 1981. The building has been designed as a 100-bed residence for psychiatric patients, comprised of four 25-bed wards and an administrative core area. This request will provide for the purchase of new furnishings for a majority of the building and the utilization of equipment from patient wards scheduled for closing as a result of the opening of the D&I Building.		
Clifton T. Perkins Hospital Center (Howard County)		
Construction of 80-bed Forensic Unit (not including a swimming pool)	8,130,000	
The Department of Health and Mental Hygiene proposes to replace the various forensic service units at the regional hospital level with a single centralized 80-bed unit at C.T. Perkins. Preliminary planning funds were appropriated in FY 80. Detailed planning funds were approved during the 1980 Session of the General Assembly. The proposed capacity of the new facility has been coordinated with the Department of Public Safety and Corrections. Funds for this project include construction of the 80-bed unit, associated administrative office space and the renovation of the central kitchen. Funds are not included for the swimming pool area requested by DHMH as a result of the increased capacity at Perkins associated with the 80-bed unit.

DEPARTMENT OF PUBLIC SAFETY AND CORRECTIONAL SERVICES

DIVISION OF CORRECTION

Headquarters:

Preparation of **detailed plans** and specifications for the construction of a **250 bed maximum security housing unit** on a site in the vicinity of the **Maryland Penitentiary**—(Baltimore City)

\$400,000

Last year the General Assembly authorized funds to acquire a site in the vicinity of the Maryland Penitentiary on which to erect an institution capable of housing up to 500 inmates. At the same time, planning funds were authorized to develop preliminary plans for this institution. This project will provide funds to continue the planning through detailed plans. Planning can commence as soon as the site has been acquired. Construction funds will probably be required in FY 1983.

To supplement the appropriation "Acquisition of land in the vicinity of the **Maryland Penitentiary** . . ." as shown on page 2380 of the Acts of 1980; Section 6 of Chapter 671 of the Acts of 1977 as amended by Chapter 174 of the Acts of 1978 and chapter 707 of the Acts of 1979 being hereby modified to the extent that said work may begin upon satisfactory assurances to the Board of Public Works that said project can be completed with the aggregate of the funds herein and heretofore appropriated for that purpose. — (Baltimore City) .

1,700,000

This project requests additional funds to acquire land adjacent to or in close proximity of the new proposed 250 bed maximum security housing unit. The funds will acquire a second site on which another housing unit, not to exceed 250 beds, could be erected. Construction of additional facilities will be limited to a maximum of 500 beds at the site or sites acquired in the vicinity of the Maryland Penitentiary.

Phase III to develop **detailed plans** and specifications to correct the **fire/safety deficiencies** at the Correctional Camps and construction funds to **eliminate** fire/safety **deficiencies** in the other correctional institutions—(Anne Arundel, Washington, Carroll, Wicomico, Queen Anne's, Charles and Howard Counties)

500,000

DEPARTMENT OF PUBLIC SAFETY AND CORRECTIONAL SERVICES—(Continued)

Project	Method of Financing	
	GCL	General Fund
Fire/Safety Deficiencies (Continued)		
<p>In the 1979 and again in the 1980 sessions of the legislature, funds were appropriated to complete Phase I and Phase II to eliminate the fire/safety deficiencies uncovered by a joint fire inspection team. This year's appropriation will provide funds to continue Phase III corrective work. It will also develop detailed plans to correct the deficiencies found at the Eastern Pre-release Camp, at the Poplar Hill Pre-release Camp, at the Southern Pre-release Camp and at Central Laundry. The most critical deficiencies are to be eliminated first. Minor deficiencies may be coordinated with the work being planned to upgrade the State's penal institutions.</p>		
<p>To supplement the appropriation "Construction of a Community Adult Rehabilitation Center in Baltimore City. . ." as shown on page 300 of the Acts of 1973, as amended by Chapter 886 of the Acts of 1975; Section 8 of Chapter 195 of the Acts of 1973 being hereby modified to the extent that said work may begin upon satisfactory assurances to the Board of Public Works that said project can be completed with the aggregate of the funds herein and heretofore appropriated for that purpose—(Baltimore City)</p>		
	1,900,000	
<p>Construction documents are currently being prepared to erect a 38 bed CARC unit (Threshold) and a 40 bed CARC unit (St. Gregory) in Baltimore City. Funding for these two CARC was initially authorized in the 1973 session of the legislature. The architect's cost estimate for these two units now exceed the funds that are available. The cost to construct these projects has risen in step with inflation over the past eight years. This supplement will provide the necessary funds to complete these two CARC facilities in Baltimore City.</p>		
<p>To supplement the appropriation "Equipment for the 500 bed security annex. . ." as authorized by Chapter 518, page 1592 of the Acts of 1980 and as set forth on page 1-130 of Volume I of the Maryland State Budget for Fiscal Year ending June 30, 1981 submitted to the General Assembly by the Governor —(Anne Arundel County)</p>		
	175,000	
<p>This request is to provide additional funds to equip the new 512 bed medium security Annex #1 at Jessup. The facility should be-ready to open some time during the fourth quarter of FY 1981. The original equipment list was submitted prior to the start of construction, however, it did not contain sufficient equipment to place the facility into full operation. This supplement will rectify that deficiency.</p>		
TOTAL—HEADQUARTERS	\$4,675,000
Maryland House of Correction (Anne Arundel County):		
<p>Preparation of a detailed plans and specifications and construction of a 192 bed medium security housing unit.—</p>		
	\$6,100,000	
<p>This project will start the renovation program at the House of Correction. Four new housing units will be erected on the site to provide 768 new medium security beds. Each unit will provide housing for 192 inmates in single cells containing 62.5 square feet of space. This construction will maintain the Jessup inmate census at the 3400 bed ceiling limitation placed on the area by the General Assembly. The existing cell space replaced by this construction will either be razed or converted to another use.</p>		
<p>Extend the Anne Arundel County water main to the House of Correction and renovation of the water storage facilities in the Jessup Complex</p>		
	400,000	
<p>The State has consummated an agreement with Anne Arundel County to furnish water to the State facilities in the Jessup Complex. The County water is to be available and in operation by July 1982. This will eliminate the need</p>		

DEPARTMENT OF PUBLIC SAFETY AND CORRECTIONAL SERVICES—(Continued)

Project	Method of Financing	
	GCL	General Fund
Jessup Water Improvements (Continued)		
for corrections to operate a water treatment plant at the Jessup area. The water storage facilities at the complex also must be renovated to provide a back up reserve for the area for fire protection and other unforeseen emergencies. The completion of the water connection and water storage capacity become critical when one considers the amount of new inmate housing that is being built at Jessup. These funds should solve the water problem.		
TOTAL—MARYLAND HOUSE OF CORRECTION	\$6,500,000
Maryland Penitentiary (Baltimore City):		
Demolition of the Woodwork Shop and "G" Building	\$775,000	
The Woodwork Shop and "G" Building are to be demolished in order to prepare the area for the renovation work that is to take place at the Penitentiary. The Woodwork Shop contains about 35,000 square feet of space, requires extensive repair and roof replacement and is badly underutilized. When razed, this area will be used for outdoor recreation. The area occupied by "G" Building is scheduled to be converted to a sallyport where food can be loaded into vehicles that will take it to the Reception/Diagnostic Building which will become operational next spring or early summer.		
Renovate the Print Shop to Library—Education Space	1,300,000	
All consultant studies made to date have indicated that the Print Shop should be converted to program space. Plans have been already completed to convert the second floor of the shop to space for an educational program. Tentatively, the first floor is scheduled to be converted to a library. The Print Shop Building will then contain most of the programs that will be available at the Penitentiary. This request will provide the funds to make this conversion.		
TOTAL—MARYLAND PENITENTIARY	\$2,075,000
Maryland Correctional Institution—Hagerstown (Washington County):		
To supplement the appropriation "Replace Boiler Controls at the Power Plant. . ." as authorized by Chapter 86, page 334 of the Acts of 1979 and set forth on page I-118 of Volume I of the Maryland State Budget for Fiscal Year ending June 30, 1980 submitted to the General Assembly by the Governor	\$100,000	
The cost of energy control items have soared over the past year. Funds authorized last year are not sufficient to complete the project. Without these new controls, it will be difficult to operate the power plant efficiently. Due to the age of the existing controls, repair parts are no longer available. This project will provide the necessary funds to replace the obsolete controls.		
Maryland Correctional Institution for Women—Jessup: (Anne Arundel County):		
To supplement the appropriation "Renovation of Lane Cottage. . ." as authorized by Chapter 44 page 699 of the Acts of 1978 as set forth on page I-107 of Volume I of the Maryland Budget for the Fiscal Year ending June 30, 1979 submitted to the General Assembly by the Governor.....	\$650,000	
Construction funds for this project were originally authorized in 1978, however, the renovation work could not start because renovation of "B" cottage had not been completed. This delay has caused the cost to renovate the cottage to increase. Lane Cottage is the last of the four housing units at the Women's Institution to be renovated. The work to be accomplished will include replacement of all utilities, plumbing and water lines, the heating system, the roof and will install a new ventilation system. The renovation will		

DEPARTMENT OF PUBLIC SAFETY AND CORRECTIONAL SERVICES—(Continued)

Project	Method of Financing	
	GCL	General Fund
Lane Cottage Renovation (Continued)		
place this housing unit into an "as good as new" condition and will extend the useful life of the building for another 20-30 years.		
TOTAL—DIVISION OF CORRECTION	\$14,000,000
Purchase and renovation of a half-way house for Patuxent Institution— (Baltimore City)	\$450,000	
Last year Patuxent was authorized to purchase a house at 512 Cathedral Street, Baltimore as a half-way house and crisis center for parolees living in the Baltimore Area. At the same time, the General Assembly required Patuxent to continue to search for a better structure. The search uncovered the Associated Jewish Charities and Welfare Building which would be available in November 1980. The building is larger, in better condition and will cost less to renovate. Appraisals have been made on the building. The building will cost approximately \$290,000 and renovations another \$160,000 as compared to the \$580,000 required to purchase and repair the Cathedral Street Building.		
Replace the sally-port gates at the Main entrance to the Institution — (Howard County)	90,000	
Patuxent has been operational now for approximately fifteen years. Its sally-port gate has recently developed a flaw in the braking device which allows the gate to jam the micro-control device. The gate cannot be moved until the device is replaced. The repair is both costly and time consuming. This project will furnish the necessary funds to replace the gate.		
Planning and preparation of detailed plans and specifications to renovate the heat distribution system —(Howard County)	20,000	
The heating systems in the housing units require extensive repair in order to economize on fuel. The maintenance supervisor estimates that these repairs will save sufficient fuel to pay for their installation within 2 to 3 years at the most. General Services feel that detailed plans should be prepared to determine the scope of the work and its cost before authorizing construction funds.		
TOTAL—PATUXENT INSTITUTION	\$560,000
MARYLAND STATE POLICE:		
Construction of a detachment headquarters and aircraft repair hangar building at the Martin Airport —(Baltimore County)	\$2,500,000	
The State Police Aviation Section is currently housed in a Strawberry Point Hangar at the Martin Airport. This hangar is to be razed because of its dilapidated condition and remote location. State Police have negotiated for a new site near the National Guard on which to erect a new 25,000 square foot headquarters and repair hangar for their Aviation Section. The program for the new hangar has been completed and the project should be ready to go to bid early in FY 1982. This request will provide the construction funds required to place this project under construction.		
To supplement the appropriation "Design and construction of detailed plans and specifications for construction of a Crime Laboratory..." as autho- rized by Chapter 86 page 334 of the Acts of 1979 and set forth on page I-119 of Volume I of the Maryland Budget for the Fiscal Year ending June 30, 1980 submitted to the General Assembly by the Governor —(Baltimore County)	50,000	
The State has relinquished its claim to the elementary schoolhouse building in Pikesville in return for a County facility located on Sudbrook Lane adjacent to State Police Headquarters. The County will erect a library on the school site and when it is completed, the County will vacate the Sudbrook site		

DEPARTMENT OF PUBLIC SAFETY AND CORRECTIONAL SERVICES—(Continued)

Project	Method of Financing	
	GCL	General Fund
Maryland State Police (Continued)		
and release it to the State. As of Dec. 15, 1980 the County has razed the school building and should be ready to commence construction of library soon after the first of the year. The State has selected an architect to develop the plans for its Crime Laboratory. The requested supplemental funds, together with the funds authorized last year, will be adequate to complete the detailed plans for the Crime Laboratory.		
Planning and preparation of detailed plans and specifications for the construction of the Golden Ring State Police Barracks —(Baltimore County)	50,000	
This State Police Barracks is to be located at the corner of Martin Boulevard and Kelso Drive adjacent to the District Court Building. Funds previously authorized for this barrack were authorized for the acquisition of land and preparation of preliminary plans. The current request is for funds to continue development phase of planning through detailed plans.		
Equipment for the Leonardtown State Police Post —(St. Mary's County)	60,000	
Additional funds are required to equip the Leonardtown State Police Post. The funds are to be used to install an electric communications console in the control room of police post and to relocate a radio tower now on site at the old Randallstown facility and move it to the Leonardtown Police Post. These two items should complete the construction work at the facility.		
TOTAL—MARYLAND STATE POLICE	\$2,660,000	
TOTAL—DEPARTMENT OF PUBLIC SAFETY AND CORRECTIONAL SERVICES	\$17,220,000	

UNIVERSITY OF MARYLAND

COLLEGE PARK CAMPUS (Prince George's County):

Phase II, Alterations and Addition to the Engineering Classroom Building	\$5,850,000
The 122,000 gross square foot Engineering Classroom Building was constructed in the late 1940's and suffers from design and materials defects common to construction in that post-World War II period. Structural and mechanical problems abound, and a complete renewal of the structure inside the four walls must be accomplished if the building is to be preserved for long-term use. Also, changes in the Engineering curriculum over the past 30 years require new types of labs and reconfiguration of the existing space to make the building responsive to present-day requirements. A 17,000 square foot addition is planned so that the entire project can accommodate the program needs of the College of Engineering. College Park has the only comprehensive engineering school in the State, and the impact of that school on the State's economy is considerable; consequently, this project carries a high priority. GCL 1981 included \$6,100,000 for Phase I, which comprises the addition, site and utilities work, and third floor renovations; this request is for funds for the remaining work needed. The entire project is expected to be ready for bid in late summer 1981.	

Conversion of the Bureau of Mines Building to a Microbiology Building .	5,950,000
The 67,600 square foot Mines Building was constructed in 1932 by the U.S. Department of the Interior and has functioned as an administrative and	

UNIVERSITY OF MARYLAND — (Continued)

Project	Method of Financing	
	GCL	General Fund
College Park Campus (Continued)		
laboratory research center for the Bureau of Mines. The University secured title to the building and grounds in 1968, and the Bureau of Mines vacated the structure last year. This project involves the conversion of the building and construction of a small addition to house the Department of Microbiology, which currently occupies a portion of the Skinner Building. The Department's existing quarters are clearly inadequate for the instructional and research workloads presently scheduled. The space to be provided in the Mines Building, with a small 8,500 square foot addition, is needed to assure a quality level of instruction and research for the existing levels of enrollment. The project is under design, with an estimated bid date of fall, 1981.		
Encapsulation of asbestos, Phase II	400,000	
Exposed asbestos is a major problem in many College Park buildings. As required by the Federal Toxic Substances Control Act, the University has performed an extensive room-by-room survey to document the hazardous conditions and has prepared a multi-phased program of corrective action, presently estimated to cost \$1,860,000. Phase I (\$350,000) was funded in the FY 1981 Capital Appropriation to the Board of Public Works. This request is for funds to continue the work in academic and related facilities. The University is funding work in auxiliary enterprise facilities from the University-funded construction program and has also applied for a Federal grant.		
Design and preparation of detailed plans and specifications for alterations and an addition to McKeldin Library	500,000	
McKeldin Library is the main resource center for the entire University, and particularly for the graduate students and faculty. Built in 1956, this 208,000 gross square foot building was designed to hold 1,000,000 volumes and has now reached saturation. Moreover, design errors at the time of construction resulted in an HVAC system which functions poorly as well as uneven floor loadings. The purpose of this project is to correct the above problems, rearrange space in the existing building, and add an additional 138,000 gross square feet, so that the library will be able to accommodate 2,000,000 volumes by 1995. This is the minimum collection size needed both to meet national standards and to achieve parity with other nationally prominent State universities of comparable size, most of which have larger collections than that at McKeldin. A preliminary planning appropriation of \$300,000 was included in the FY 1981 Capital Appropriation to the Board of Public Works. The total project cost is estimated to exceed \$25,000,000.		
Building safety modifications, Phase III	500,000	
Many old buildings at College Park do not meet current life safety code requirements. Funds were appropriated in GCL 1975 and GCL 1976 to initiate corrective action. Phase III and subsequent phases will focus on enclosure of existing open stairwells, provision of new fire-rated stairwells, and installation of standpipe and sprinkler systems as necessary. The total campuswide program has an estimated cost of \$3.6 million and should be pursued on a timely and consistent schedule, as resources permit.		
TOTAL—COLLEGE PARK CAMPUS	\$13,200,000
BALTIMORE CITY CAMPUS:		
Construction of a Volatile Solvents Storage Building	\$400,000	
This project proposes the construction of a small 2,000 square foot structure in the narrow space between Redwood Hall and St. Paul's Cemetery to serve as a central storage facility for all volatile liquids and gases on campus. Existing storage arrangements for these materials, consisting of several unsuper-

	GCL	General Fund
Baltimore City Campus—(Continued)		
vised storage cabinets and lockers scattered through the Campus, are hazardous and constitute code violations. The proposed structure would make possible centralized control over all volatile solvents in a safe location. The project is under design, and should be constructed as soon as possible to eliminate the existing dangerous conditions.		
Capital Equipment for the School of Pharmacy Building, Phase I	1,500,000	
The School of Pharmacy Building is now under construction with funds appropriated in GCL 1977. The estimated completion date is March, 1982. This request is for half of the capital equipment deemed essential for the proper functioning of the building after it is opened. The remaining half will be requested in FY 1983.		
Capital Equipment for the new incinerators	232,000	
A new general waste incinerator and a new radioactive waste incinerator will be installed on campus with funds appropriated in GCL 1980. This request is for the capital equipment deemed essential for the operation of the incinerators, which are expected to be ready in the spring of 1982.		
Capital equipment for the Addition to the School of Social Work and Community Planning	(390,000)	
The ground breaking for the Addition to the School of Social Work and Community Planning was held in December, and the estimated completion date for construction is December, 1982. A favorable bidding climate led to a contract award which results in an unencumbered balance in the GCL 1980 construction appropriation of \$1,600,000. An amendment to the GCL 1980 appropriation is requested in GCL 1981 to utilize the surplus construction funds for essential capital equipment in lieu of authorizing additional debt for that purpose. Accordingly, the sum identified above is not included in the GCL 1981 totals.		
TOTAL—BALTIMORE CITY CAMPUS	<u>\$2,132,000</u>	<u>.....</u>
EASTERN SHORE CAMPUS (Somerset County):		
New Construction Technology and Art Education Building	\$5,100,000	
Many of the buildings on the UMES Campus are very small, ill-suited to the programs they house, and in substandard condition. The University's plan for revitalizing the campus and increasing its enrollment include the introduction of three new academic programs and the construction of three new facilities to house those programs along with related existing programs which occupy substandard buildings. The first priority is the Technology Building, which would house the new Construction Technology program plus existing programs in Industrial Technology and Art Education. The latter two programs now occupy Bird, Banneker, and Tanner Halls, all very small buildings which are in poor condition and which are scheduled for demolition or conversion to student housing. The proposed 50,000 gross square foot building is under design and is expected to be ready for bid next winter.		
Demolition of Kiah Hall and the former Student Lounge	120,000	
Kiah Hall, a building of 24,000 gross square feet, was constructed in 1940. The former Student Lounge, a building of 12,000 gross square feet, was constructed in 1939. Both buildings are vacant and in deteriorated condition with many code violations. Renovation for continued use would be cost-ineffective. Funds are requested to demolish these buildings so that they will not be asethetic or security problems.		
TOTAL—EASTERN SHORE CAMPUS	<u>\$5,220,000</u>	<u>.....</u>

BALTIMORE COUNTY CAMPUS:		
Design and preparation of detailed plans and specifications for site restoration and development between the Commons, Academic Building IV, the Chemistry-Physics Building, and the central mall	\$30,000	
Construction of the Commons Building, for which a contract was awarded in December, will disrupt the site in the area described above. Funds are needed to design appropriate measures to stabilize the soil, control erosion, provide for appropriate circulation routes, and restore the appearance of the area.		
TOTAL—BALTIMORE COUNTY CAMPUS	\$30,000
CENTER FOR ENVIRONMENTAL AND ESTUARINE STUDIES		
Horn Point Environmental Laboratories (Dorchester County):		
Capital Equipment for the Maintenance Building	\$132,000	
A maintenance building at Horn Point, funded in GCL 1980, is scheduled for completion by the spring of 1982. This request is for capital equipment deemed essential for the proper functioning of the building.		
TOTAL—UNIVERSITY OF MARYLAND	\$20,714,000
BOARD OF TRUSTEES OF THE STATE UNIVERSITIES AND COLLEGES		
FROSTBURG STATE COLLEGE (Allegany County):		
Design and preparation of detailed plans and specifications for alterations to Allegany/Faculty Hall and Garrett Hall , and a connecting link between those buildings	\$180,000	
Allegany/Faculty Hall is essentially a single 40,000 square feet structure, although built in stages in 1913 and 1927-30. The structure is characterized by inefficient space arrangements, contains two obsolete gymnasias, and has deteriorated to the point where extraordinary maintenance must be performed to keep the building operational. The long-range development program for the college includes modification of this facility through a capital project consisting of three components: demolition of the Faculty structure, renewal of the remaining structure to extend its life so that it can permanently accommodate three academic departments in the Social Sciences, and construction of a link to Garrett Hall. The link would provide badly-needed laboratory space for the Psychology Department now housed in Garrett, and its construction would avoid the necessity of extensive additional work in both Garrett and Allegany Halls to make the buildings accessible to the handicapped in compliance with Federal regulations. There would be no overall increase in instructional space. Preliminary planning funds were appropriated in FY 1980; this request is for funds to complete the planning process.		
Provision of final wearing surface on Physical Education Building parking lot	50,000	
GCL 1979 included funds for a new parking lot southwest of the Physical Education Building. The funds proved insufficient to award a contract for all of the work; consequently, the final wearing surface was deleted from the contract. This request would permit application of that surface to provide essential protection for the base course and minimize the likelihood of premature deterioration.		
TOTAL—FROSTBURG STATE COLLEGE	\$230,000	

BOARD OF TRUSTEES OF THE STATE UNIVERSITIES AND COLLEGES — (Continued)

Project	Method of Financing	
	GCL	General Fund
TOWSON STATE UNIVERSITY (Baltimore County)		
To supplement the appropriation, "Alterations to Smith Hall," as shown on page 2322 of the Acts of 1978; Section 1(7) of Chapter 795 of the Acts of 1978 being hereby modified to the extent that said work may begin upon satisfactory assurances to the Board of Public Works that said project can be completed with the aggregate of the funds herein and heretofore appropriated for that purpose	\$3,925,000	
<p>Smith Hall, the Science building, was constructed in the 1960's, and an addition was provided in the mid-1970's. The plans for the addition included alterations to the original structure so that both the old and new sections could function as a unitary facility in terms of space layout and HVAC systems operations. However, the alterations were not funded until 1978, and bids received last year exceeded the \$2,875,000 appropriated. As the original 80,000 square foot section is now vacant and needs new plumbing as well as correction of safety hazards, supplemental funds are requested this year to expedite the needed improvements. A value engineering study has been performed to maximize the cost effectiveness of the project.</p>		
UNIVERSITY OF BALTIMORE (Baltimore City):		
To supplement the appropriation, "Construction of an addition to the Academic Center," as shown on page 2697 of the Acts of 1977 and as previously supplemented by Chapter 420 of the Acts of 1979, and as further amended by Chapter 403 of the Acts of 1979; Section 1(6) of Chapter 671 of the Acts of 1977 and Section 1(7) of Chapter 420 of the Acts of 1979 being hereby modified to the extent that said work may begin upon satisfactory assurances to the Board of Public Works that said project can be completed with the aggregate of the funds herein and heretofore appropriated for that purpose; and to acquire capital equipment for the addition	\$825,000	
<p>When a contract was awarded for this project in December, 1979, certain alternates had to be rejected to keep the contract award within the funds available. This request is for funds to complete certain of those work elements which were deferred but which are necessary for the proper functioning of the building — i.e., the emergency generator, the moot court room, library stacks and carrels, and other built-in equipment — as well as to provide needed items of movable capital equipment.</p>		
TOTAL—STATE UNIVERSITIES AND COLLEGES	\$4,980,000

MARYLAND SCHOOL FOR THE DEAF

COLUMBIA CAMPUS (Howard County):

Equipment for the Intermediate School	\$100,000
---	-----------

The Intermediate School, which was authorized in the GCL of 1978, is scheduled for completion in August 1982. This capital equipment is deemed essential for the operation of the School.

MORGAN STATE UNIVERSITY (Baltimore City)

Project	Method of Financing	
	GCL	General Fund
<p>To supplement the appropriation, "Replacement of the Underground Steam Distribution System" as authorized by Chapter 518, page 1592 of the Acts of 1980 and as set forth on page I-133 of Volume I of the Maryland State Budget for the Fiscal Year ending June 30, 1981, submitted to the General Assembly by the Governor</p> <p>The steam distribution system at Morgan State was constructed in the 1940's and is now in deteriorated condition, with corroded pipes, failures in the pipe supports, and inadequate manhole drainage. Replacement is essential. As the project has proceeded through the various design stages, it has become evident that replacement will cost more than \$2,000,000 included in the FY 1981 Capital Appropriation to the Board of Public Works. Funds requested herein, when added to those previously appropriated, will provide the amount currently estimated to be needed to complete the project.</p> <p>Design and preparation of detailed plans and specifications for alterations and additions to the Science complex (Carnegie, Calloway, Key and Spencer Halls and the Vivarium), including partial demolition as needed, to modernize the instructional facilities for the Natural Sciences and Home Economics .</p> <p>Morgan's science and home economics programs are presently housed in the five buildings cited above. The structural and mechanical systems in those buildings are in varying stages of disrepair, and the laboratories are clearly insufficient and inadequately equipped for advanced instruction in the sciences. A program has been submitted which would provide 98,000 square feet of instructional space, as compared to the present 78,000 square feet. Although an entirely new science facility has been considered, such a building, when added to existing surpluses of space on campus, would create a space surplus of Morgan of over 300,000 square feet, costing over \$1 million per year in heat and maintenance costs alone. The funds herein requested would, as a more cost-effective alternate, permit design of improvements to the existing facilities to increase their functional effectiveness and extend their useful life.</p>	\$950,000	
	625,000	
TOTAL—MORGAN STATE UNIVERSITY	\$1,575,000

DEPARTMENT OF ECONOMIC AND COMMUNITY DEVELOPMENT

ST. MARY'S CITY COMMISSION:

<p>Design, preparation of detailed plans and specifications, and construction of a Visitors Center Complex</p> <p>Existing farm buildings will be renovated and altered for use as a visitor center. A 6,000 sq. ft. space will be utilized in a barn and farmhouse to house visitor facilities including orientation and reception, exhibit areas, auditorium, restrooms, first aid/security and book/gift shop. Other farm buildings in the complex will be renovated and landscaped to enhance the appearance of the site. A 100 car parking lot will be constructed and landscaped in a field adjacent to the buildings. The Visitor Center Complex is the focus for all Project 84 park and museum development. The present limited facilities can no longer adequately accommodate the public. As visitation increases, the museum faces a growing dilemma of limited and crowded visitor contact, strained restroom facilities and little sense of the developing parklands. In order to be ready for the 350th anniversary of the founding of Maryland, construction should be completed in the summer of 1983.</p>	\$1,330,000
---	-------------

DEPARTMENT OF ECONOMIC AND COMMUNITY DEVELOPMENT — (Continued)

Project	Method of Financing	
	GCL	General Fund
Construction of State House and Tavern Exhibits	700,000	
<p>These construction funds will be used to renovate the Reconstructed State House of 1676 and to reconstruct a 17th-century inn complex. The inn complex will include an authentic reconstruction of a ca. 1680 inn, together with its stable, meathouse and kitchen. The stable will house an orientation facility and restrooms. The kitchen will have modern facilities to service a seasonal outdoor eating facility. Site improvements would include a reconstruction of the original inn yardscape (orchard, fences and gardens) and a landscaped parking lot. The State House/Inn exhibits are an essential part of the St. Mary's museum's interpretive plans for 1984 (Maryland's 350th birthday). The planned development will renovate the old State House and return it to its original function as an exhibit. The inn complex will interpret the life of St. Mary's City as a governmental center and provide a needed period eating facility on the site of the original community.</p>		
Stabilization of van Sweringen Inn Archaeological Site	25,000	
<p>Construction funds will be used to stabilize and interpret the site of a St. Mary's City inn constructed in 1670. The 17th-century structures at Old St. Mary's City have all disappeared and the original Maryland capital is essentially an archaeological site. This project is close to the Old State House Complex and is part of Project 84. The design of this project will be completed in-house. The van Sweringen Inn site is only a few hundred yards from the planned reconstructed inn, so visitors will be able to see the stabilized remains of an original structure as well as a modern reconstruction.</p>		
Construction of St. John's Archaeological Exhibit	210,000	
<p>Construction funds will be used to place a permanent interpretive and protective structure over the historic St. John's house site to protect the fragile archaeological site and interpret the history of the 17th-century house with static and audio-visual exhibits. St. John's is the oldest house foundation yet excavated in Maryland. It was the site of most of the public meetings between 1638 and 1650, which included Margaret Brent's request for a vote and the Act of Religious Toleration. It was the home in the 1660's of the only Lord Baltimore to live in Maryland. The stabilization and interpretation of the site is an important part of Project 84.</p>		
TOTAL—ST. MARY'S CITY COMMISSION	\$2,265,000

MARYLAND HISTORICAL TRUST:

To establish a **Capital Grant Fund for Historical Preservation** to be expended only with the approval of the Board of Public Works and only for grants to non-profit corporations, organizations or foundations. All grants, other than for State owned facilities, are subject to the following matching funds requirement; local matching funds shall be equal to at least fifty percent of the total project cost and may not consist in whole or in part of federal grant monies; any federal grant for a project shall be applied dollar for dollar to reduce the amount of the State grant. The Maryland Historical Trust shall present annually to the Board of Public Works and to the General Assembly a report on the status of this fund and a proposed program for the use of the fund during the following fiscal year; the report shall be submitted by December 1

\$300,000

The Maryland Historical Trust Grant-in-Aid Fund was initiated in 1977 to alleviate the need for funding specific items requested by the Maryland Historical Trust. The grant-in-aid fund is for the Maryland Historical Trust to distribute to qualified applicants. These funds will be distributed as grants to non-profit preservation foundations and organizations, to implement and encourage acquisition, preservation and restoration of historic properties.

PART III
DEPARTMENTAL CAPITAL NEEDS PROPOSED
FOR FIVE-YEAR PERIOD 1982-1986

This section lists all capital needs, other than those associated with the Department of Transportation or financed through special bond authorizations, which the various State departments and institutions requested be undertaken during the five-year period, fiscal 1982-1986.

The grand total of these projects requested in the calendar year 1980 for inclusion in the State's five-year capital improvement program is \$740,166,369. This represents an average annual capital outlay request of about \$148,033,274. Individual project requests for fiscal years 1982-1986 ranged in scope from a low of \$2,500 to a high of \$16,480,000.

The tabulation and summary which follow serve to give a longer range perspective as to future capital needs and the overall level of required capital outlay by the State. It is important to note that none of the projects, other than those recommended in the Fiscal 1982 Capital Improvement Program have been officially approved. The Department of State Planning, with the collaboration of the Office of the Comptroller, the Department of Budget and Fiscal Planning, the Department of Fiscal Services and the Treasurer's Office, continues to develop an improved and refined process leading to a more realistic Five-Year Capital Program which will include the Capital Improvement Program as well as other separate bond authorization bills, based upon "affordability" analysis.

It should be remembered that those projects requested for fiscal 1982 which are to be deferred or deleted, for varying reasons, may affect the capital needs in the ensuing years. As an indication of the magnitude of specific requests, Fiscal 1982, 249 projects; Fiscal Years 1983-1986, inclusive, 440 for a grand total of 689.

The projects listed herein which are included in all or part in the Fiscal Year 1982 Capital Improvement Program are identified as follows: GCL 1982 funded projects are marked with a dagger (†). The amounts recommended to be appropriated for these capital improvement projects may differ from the sums as listed herein primarily due to: (1) adjustments in project scope, (2) late additions and/or deletions, and (3) DGS revised cost estimates. Cost figures represent anticipated cost to the State and do not include Federal funds available or anticipated for these projects. Environmental assessment forms have been submitted with appropriate projects. Non-budgeted funds for capital projects are footnoted.

PART IV

POTENTIAL COMMITMENT OF FUTURE CONSTRUCTION FUNDS CREATED THROUGH APPROPRIATIONS OF PLANNING FUNDS

Planning funds is a term applied to an appropriation for:

(a) Preliminary Planning Funds—any necessary study including the development of preliminary plans and specifications for a major construction project.

(b) Detailed Plans and Specifications—the preparation of final working drawings which specify in detail the specific design and capacities for a construction project upon which basic bids are submitted.

By law, the preliminary plans and specifications must be available at the time that the General Assembly is requested to appropriate construction funds for a project. The State follows this practice in order to provide for: (1) needed engineering or other preliminary studies; (2) the development of better facility programs and plans; and (3) more accurate project cost estimates—all in the interest of obtaining the best facility for the least cost.

While it does not hold that construction funds will inevitably be provided in the first or second year following the appropriation of planning funds, there does exist a potential commitment of construction funds in the future.

The tabulation herein provided, covering planning funds in prior construction loans, discloses such a potential (based upon the Agency's cost estimate) approximating \$361,570,759. Projects for which planning fund appropriations are proposed in the FY 1982 Capital Budget will aggregate \$37,965,000 in projected construction costs.

The total estimated costs indicated above are net of anticipated federal funds which are or may become available.

PART IV-A

POTENTIAL COMMITMENT OF FUTURE CONSTRUCTION FUNDS CREATED THROUGH APPROPRIATIONS OF PLANNING FUNDS IN PRIOR CONSTRUCTION LOANS

Project	Date of Appropriation	Planning Appropriation	Departmental Estimated Project Cost
BOARD OF PUBLIC WORKS:			
Office Building and Parking Garage—SB #5 — Baltimore	1970	\$100,000	\$32,910,000
	1971	200,000*	
	1973	340,000*	
Data Processing Center—Comptroller-Annapolis	1974	20,000	7,350,000
District Court Building—Baltimore City	1975	240,000*	5,750,000
District Court/Multiservice Center—Upper Marlboro	1976	185,000*	5,546,000
